ADVERSE CHILDHOOD EXPERIENCES

*An
Introduction*

This is **one of six ACE Booklets** with different featured stories. To read the others, go to:
www.uniongospelmission.org/aces

WHAT IS AN ACE?

Adverse childhood experiences, or ACEs, are **traumatic events** that occur in childhood (0-17 years) including divorce, substance abuse in the home, violence, death or incarceration of a parent, and neglect. The higher an individual's ACE score, the more likely he or she is to experience chronic health problems, mental illness and substance abuse in adulthood. High ACE scores have also been linked to repeated job loss, incomplete education and homelessness.

On the following pages, you will have the chance to get to know a current or former UGM resident who experienced severe childhood trauma. As you keep reading, **we welcome you to pray** for your featured individual and for the countless men and women battling the effects of childhood trauma today.

“Being homeless made
me feel **disposable.**”

This is a real person, but we've used a
different name to protect his privacy.

JOSH

CHILDHOOD

Physical abuse, substance abuse in the home, neglect, homelessness.

RESULT

Substance abuse, incarceration, homelessness.

AT UGM

Successful completion:
LIFE Recovery program.

TODAY

Recovery is a hard road. Not everyone maintains sobriety or a job after completing Program. Continue this workbook to see where Josh is today.

**YOUR
SCORE:**

TODAY

After completing UGM Recovery,
Josh got married and was reunited
with his son. Today he enjoys work
in a skilled trade and is grateful
for his many successes.

If you or someone you know is struggling with the effects
of trauma or abuse, please see the resources below.
